

REVIEW FOR TREVOR

This is very intense, dude, thanks for all of your work.

There are way more image categories than I expected! Complete as many as you want/ you have time for, maybe cut out the categories with broader/vaguer titles.

You could reduce the text block width, the span can get hard to read.

Distinction between the examples on the ABOUT page and the CATEGORIES page is confusing. The ABOUT examples could be just a gallery of flat images that don't link to anything. Maybe hint that more images can be seen in greater depth on the CATEGORIES page.

Could increase line-height on all pages.

Could increase font sizes of the headers (especially on the ABOUT and PHOTOGRAPHERS page).

Thin about putting lined images in rows of three rather than four. Give them a little more negative space.

LOOKS GOOD
